jhead@afsinc.org

***Professional History:***

Jennifer began her career teaching high school science in 2000, after graduating from Clemson University with a Bachelor's Degree in Education. She taught all levels of courses in the areas of biology and physical science, and was the biology instructor for the International Baccalaureate program. Jennifer joined the Cast Metals Institute in 2005. Her areas of responsibility include the administration and operations of the Cast Metals Institute's programs and facilities; developing the annual budget; assessment of industry training needs; creation, implementation, and oversight of a new strategic plan; overseeing educational programs including content and development of new courses, ensuring they meet with IACET standards for continuing education; and development of the yearly course schedule.
